COVID-19 Vaccine

MYTHS

It changes your DNA.

It can give you COVID-19.

It contains egg protein.

It causes severe side effects.

It makes women infertile.

FACTS

It is impossible for any vaccine to change your DNA.

You cannot get COVID-19 from the vaccine. The vaccine doesn't contain a live virus strain.

The vaccine doesn't have egg proteins and can be administered to people with egg allergies.

Severe side effects are very rare. Mild side effects like fever and feeling achy for 24-48 hours are not uncommon.

There is no evidence that the vaccine causes infertility and the vaccine is safe in pregnancy.
